JB01 Fire Extinguisher cabinet (Dubai)

Typical use:

For the storage of 1 x 12 Litre or 5kg CO2 Fire extinguisher (max height 939mm) designed to cope with extreme environments on and offshore. It is widely used by the world's top energy company due to its durability.

Description:

These cabinets are manufactured using Lloyds approved composites including UV resistant gelcoats to provide long lasting protection for the fire extinguisher in even the harshest environments. This is backed up with an excellent IP rating of 56. It has both Lloyds and ABS approvals.

The design ensures a high level of rigidity for the relatively low weight with a very effective EPDM seal around the door aperture. The 316 Stainless steel hinges are secured with 316 stainless steel nuts, bolts and washers.

The door can be specified with left or right hinging and features a nylon rod handle to pull the door open to guarantee fast access in an emergency even when wearing gloves.
