JB82NHS MK3 Fire Extinguisher Cabinet

5 Year
Guarantee

Typical use:

For the storage of 1 x 9-12 Kg Fire Extinguisher (excluding 5Kg CO2 extinguisher). This cabinet was designed in conjunction with the NHS for use in secure units. It is an anti-ligature design with tamper proof features.

Description:

These cabinets are manufactured using Lloyds approved composites including UV resistant gelcoats to provide long lasting protection for equipment stored inside in even the harshest environments. This is backed up with an excellent IP rating of 66. It has both Lloyds and ABS approvals.

The design ensures a high level of rigidity for the relatively low weight with a very effective EPDM seal around the door aperture. The 316 stainless steel hinge is concealed and the door fitted with a lock with steel surround.

The door can be specified with left or right hinging and features a nylon graphite rotary handle featuring Biomaster® Anti-microbial technology. This ensures the key holder can open the cabinet rapidly in an emergency.

Standard specification:

Dimensions (mm)

Height x width x depth: 799 x 374 x 280

Aperture: 636Hx 218W

Internal depth: 229

Weight Kg: 10Kg

Material specification:

Colour: Red RAL3000

Material: Lloyds approved composites with UV stabilised gelcoat

Hinge: Stainless steel

Handle: Nylon graphite rotary with Biomaster® Anti-microbial technology

Lock and surround: Steel

Seal: EPDM

Optional Extras:

Other RAL colours

Class 1 fire retardant composites

Manufactured in the UK
