RS550 General Purpose Cabinet

Typical use:

For the storage of miscellaneous safety equipment. The cabinet can be customised with shelves and brackets to suit the contents. This cabinet is widely used in the Offshore energy and marine sectors.

Description:

These cabinets are manufactured using Lloyds approved composites including UV resistant gelcoats to provide long lasting protection for equipment stored inside in even the harshest environments. This is backed up with an excellent IP rating of 56. It has both Lloyds and ABS approvals.

The design ensures a high level of rigidity for the relatively low weight with a very effective EPDM seal around the door aperture. The roller shutter door enables access in confined spaces. The AS shutters used have proved to be extremely durable over a very long period of time.

Standard specification:

Dimensions (mm)

Height x width x depth: 2010 x 1055 x 760

Aperture: 1500H x 824W

Internal depth: 704

Weight Kg: 71Kg
