RS550FE Fire Fighter's Equipment Cabinet

Typical use:

For the storage of firefighter's clothing (no SCBA). This cabinet is widely used in the Offshore energy and marine sectors.

Description:

These cabinets are manufactured using Lloyds approved composites including UV resistant gelcoats to provide long lasting protection for equipment stored inside in even the harshest environments. This is backed up with an excellent IP rating of 56. It has both Lloyds and ABS approvals.

The design ensures a high level of rigidity for the relatively low weight with a very effective EPDM seal around the door aperture. This cabinet is fitted with a shelf for helmets and gloves and hang rail for uniforms.

The roller shutter door enables access in confined spaces. The AS shutters used have proved to be extremely durable over a very long period of time.

Standard specification:

Dimensions (mm)

Height x width x depth: 2010 x 1055 x 760

Aperture: 1500H x 824W

Internal depth: 704

Weight Kg: 71Kg

Material specification:
