Product **data sheet**

SOS700MK2 22-24" (560mm) Lifebuoy housing

Typical use:

Marina, riversides and lakes,

For the storage of 1 x 560-610mm lifebuoy and throwing line

Description:

This fully enclosed design was created with the assistance of the RNLI. It provides excellent protection of the lifebuoy and line from both rain and UV degradation. The round design with lifebuoy symbol makes it very easy to identify in an emergency. The double doors are opened using one hand and can be fitted with an anti-tamper seal to deter theft. The labelling of the housing is integrated into the moulding and so will not peel off. The slim profile is ideal for jetties and pontoons.

There are a number of mounting options available. One of the post options is shown on the left

Standard specification:

Dimensions :Height x width x depth:

809 x 795 x 175 mm (31.9 x 31.3 x 6.9")
